IQBAL BAIHAQI ABDULAH

FRONTEND DEVELOPER

Jl. Anggrek, Petukangan Utara, Jakarta Selatan, No. 15 | baihaqiiqbal323@gmail.com | www.iqbalbaihaqi.com

Frontend Developer with 4+ years of experience building scalable, high-traffic web applications. Specialized in Next.js, React, and TypeScript with proven experience improving performance, maintainability, and user experience in production systems used by thousands of users.

AREA OF EXPERTISE

JavaScript Frameworks	UI/UX Implementation	Performance Optimization
TypeScript	State Management	Cross-Browser Compatibility
Testing and Debugging	API Integration	AI Integration

PROFESSIONAL EXPERIENCE

Frontend Developer, PT Astra International Tbk - Astra Digital Mobil **Jan 2024 - Present**

- Developing and Maintaining Applications: Built new features, fixed bugs, and improved performance and user experience for OLX and OLXmobbi applications using Next.js and React Query.
- Team Collaboration and API Integration: Worked closely with backend and UI/UX teams to implement features, ensure seamless API integration, and maintain design and functionality consistency.
- Code Optimization and Deployment: Wrote clean and efficient TypeScript code, applied frontend best practices, and managed deployment and monitoring to ensure application stability and scalability.

Frontend Developer, PT. Serasi Autoraya **Aug 2022 - Dec 2023**

- Development and Maintenance of mobbi Application: Developed and maintained the legacy mobbi application using SAP Hybris and jQuery, ensuring its stability and performance before migration.
- Migration to Next.js: Played a key role in migrating mobbi from Hybris and jQuery to Next.js, improving performance, scalability, and user experience with modern technology.
- Collaboration and Integration: Worked closely with the backend team to integrate APIs, ensure data compatibility, and implement frontend best practices using TypeScript and React Query.

Frontend Developer, Dragatron **Mar 2022 - Aug 2022**

- Web Application Development: Built and developed web applications using Next.js and React.js, ensuring optimal performance and a responsive user experience.
- API Integration and State Management: Collaborated with the backend team to efficiently integrate APIs and managed application state using React Query or Redux.
- Optimization and Scalability: Wrote clean and modular TypeScript code, applied frontend best practices, and ensured the application was scalable and maintainable.
